

post-cinematic

International conference organized in the frame of the CRC 626
"Aesthetic Experience and the Dissolution of Artistic Limits"

perspectives

november 22-23, 2013

The proliferation of video installations, computer games, and mind game films in contemporary media cultures has thrown the question of perspective in the moving image into stark relief. These post-cinematic media rearticulate a deconstruction of perspective instigated by earlier experiments in early cinema, the 1920s avant-garde, and the expanded cinema of the 1970s.

The international and transdisciplinary conference "Post-Cinematic Perspectives" aims at discussing these changes of optical and narrative perspective in post-cinematic media and apparatuses. The conference will present art historical, philosophical, film and media theoretical reflections on perspective in post-cinema as well as the changed status of the spectator-observer.

The conference is public, entry is free.

ICI Berlin

Christinenstr. 18-19, Haus 8, 10119 Berlin

fr **22nd**

10:00	Opening Remarks by Gertrud Koch
10:15	Introduction by Lisa Åkervall and Chris Tedjasukmana
